

SEVERE WEATHER BULLETIN #3 FOR: TROPICAL DEPRESSION "TONYO" TROPICAL CYCLONE: WARNING

ISSUED AT 5:00 AM, 08 November 2020

(Valid for broadcast until the next bulletin to be issued at 8 AM today)

"TONYO" TURNS WEST-NORTHWESTWARD AND IS ABOUT TO CROSS MARINDUQUE.

Track and Intensity Outlook

Tropical Depression "TONYO" is forecast to move rapidly west-northwestward or westward within the next 12 hours across the archipelago and its center is likely to pass close or over the vicinity of Marinduque and Mindoro Provinces. However, given the recent shift in the movement direction of the tropical depression, there is an increasing likelihood that its center will make landfall in the vicinity of Southern Quezon or Batangas. On the forecast track, "TONYO" will emerge over the West Philippine Sea this morning and exit the Philippine Area of Responsibility (PAR) tomorrow morning.

Hazards affecting land areas

Heavy rainfall: Today, "TONYO" will bring moderate to heavy rains over Mindoro Provinces, the northern portion of Quezon including Polillo Islands, Aurora, and the eastern portions of mainland Cagayan and Isabela. Light to moderate with at times heavy rains will also be experienced over the Ilocos Region, Cordillera Administrative Region, Metro Manila, and the rest of Central Luzon, CALABARZON, and MIMAROPA.

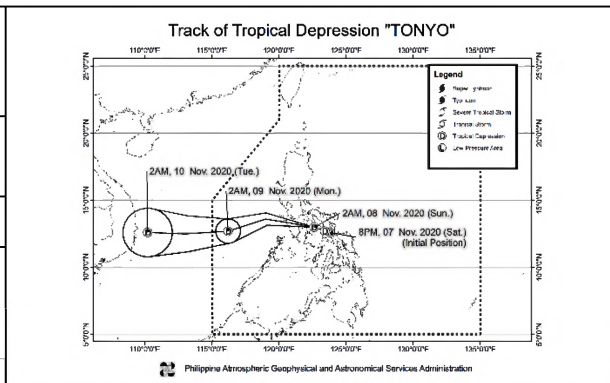

Flooding (including flashfloods and rain-induced landslides may occur during heavy or prolonged rainfall especially in areas that are highly or very highly susceptible to these hazards and/or those that received significant antecedent rainfall. PAGASA Regional Services Divisions may issue local thunderstorm/rainfall advisories and heavy rainfall warnings while the Hydrometeorology Division and River Basin Flood Forecasting and Warning Centers may issue General Flood Advisories and Basin Flood Bulletins as appropriate.

Strong winds: Areas under Tropical Cyclone Wind Signal #1 is currently experiencing or will be experiencing strong breeze to near gale conditions with occasional gusts throughout the passage of "TONYO". The Northeast Monsoon will also bring strong breeze to near gale conditions over Batanes, Babuyan Islands, Ilocos Norte, Apayao, and the northern portion of mainland Cagayan.

Hazards affecting coastal waters

Moderate to rough seas (1.5 to 3.5 m) due to "TONYO" and the prevailing easterlies will be experienced over the seaboard of areas under TCWS #1 and the eastern seaboard of Cagayan Valley, Aurora, and the northern portion of Quezon, and the northern and eastern seaboard of Catanduanes. The Northeast Monsoon will bring rough to very rough seas (2.5 to 3.5 m) over the seaboard of Batanes, Ilocos Norte, and Ilocos Sur and the northern seaboard of Cagayan including Babuyan Islands.

Location of center	At 4:00 AM today, the center of Tropical Depression "TONYO" was estimated based on all available data at 90 km South Southeast of Alabat, Quezon (13.3°N, 122.2°E) .
Strength	Maximum sustained winds of 45 km/h near the center and gustiness of up to 60 km/h .
Movement	Moving West Northwestward at 25 km/h .
Forecast Positions	<ul style="list-style-type: none">24 Hour (Tomorrow morning): 440 km West of Coron, Palawan (12.7°N, 116.2°E)48 Hour (Tuesday morning): 1,090 km West of Southern Luzon (OUTSIDE PAR) (12.6°N, 110.2°E)
